Personal statement

A Full Stack Web developer, competitive programmer and an open source enthusiast who is highly passionate about building fast, creative applications and writing beautiful code.

Highlighted Software Applications

Assets Inventory Management System- Scrum master, Full stack Software developer
August 2020-September 2020

URL:<https://assets-inventory.herokuapp.com/>

This is an asset inventory system that enables an organization to keep track of all the assets and their state, to ensure easy identification of any asset which needs repair or purchase.

- Worked on manager models where a manager can locate, approve and decline asset request.

GitHub-Search- Full stack developer

April 2020

URL:<https://glasses-png.github.io/GitHub-search/user-profile>

This is an Angular CLI application that allows a user to enter a GitHub username into a form, submit it, and see names and descriptions of that person's public repositories. A person can also look for repositories.

- Designed the UI using Angular, focusing on the simplicity and structure principles.

Technical skills

Strong: HTML, CSS, Javascript, Python(Flask and Django) and Angular.js.

Experienced: React.js and Vue.js

Personal Skills

- Professionalism; conscientious go-getter who is highly organized, dedicated, and committed to professionalism.
- Adaptability; highly adaptable, mobile, positive, resilient, patient risk-taker who is open to new ideas.
- Teamwork; resourceful team player who excels at building trusting relationships with customers and colleagues.
